<OBJECTIVE />

Coming from a background in hospitality and management, I am seeking an opportunity in Software Engineering. I am a motivated technology advocate who loves learning, problem solving, creative thinking, and creating and designing new technologies or applications.

<SKILLS />

Programming Languages: TypeScript, Node, JavaScript, Ruby, HTML, CSS

Frameworks: React, Ruby on Rails

Databases: PostgreSQL, MongoDB

Software: Yarn, NPM, Babel, Webpack, RESTful API, CSS Modules, Sass, Foundation, Bulma, Bootstrap, Tailwind, Git, GitHub, Puppeteer, RSpec, Capybara, Jest-Enzyme, Jasmine-Enzyme, AWS, Devise, Travis-CI, Netlify, Heroku, SQL

Other Tools: Microsoft Office, G-Suites, Salesforce, Photoshop, Lightroom, Photography

<PROJECTS />

Camera Roll: idkjay.github.io/camera-roll | github.com/idkjay/camera-roll Jul. 2020

Mobile friendly app that allows users to search up photos using the Unsplash API.

- Built using React, JavaScript, CSS, and React Lightbox.
- Utilized the Unsplash Photo Search API into the search function.
- Rewarded honorable mention for Mintbean Online Hackathon.

Cook at Home: idkjay.github.io/cook-at-home | github.com/idkjay/cook-at-home Apr. 2020

Recipe app that allows users to find recipes based on ingredients and food in their homes.

- Built using React, JavaScript, and CSS and auto-deployed/tested through Travis-CI.
- Utilized the Edamam Recipe Search API into the search function.

Faraway: faraway.herokuapp.com | github.com/idkjay/faraway Feb. 2020

Travel Site that allows users to search and compare inexpensive flights with ease.

- Built using React, Ruby on Rails, PostgreSQL, and Bulma.
- Integrated the Unsplash, RESTcountries, and Kiwi Flights APIs into the search function.
- Developed and test drove using RSpec and Enzyme.

Parks and Reviews: parks-and-reviews.herokuapp.com | github.com/idkjay/parks-and-reviews Feb. 2020

Review site that allows users to post and rate different park experiences.

- Built using React, Ruby on Rails, PostgreSQL, and Foundation.
- Practiced proper git workflow and pair programming in a simulated team environment.
- Created and seeded our own API made of national parks around America.
- Developed and test drove using RSpec and Enzyme.

<EDUCATION />

Launch Academy

Boston, MA

Apprentice Full Stack Developer

Oct. 2019 – Mar. 2020

- Completed immersive 18 week bootcamp and built an understanding and ability to implement complex and abstract CS methodologies.
- Spent the first 8 weeks of the program entirely online learning new strategies for development.
- Utilized Agile methodologies to promptly complete functional implementation of various new features.
- Split time evenly between pair and individual programming, both utilizing my own skills as well as simulating a proper professional environment while working on applications cooperatively with peers.
- Built two fully functioning web applications through test driven development, each in a 2-week sprint timeframe.

University of Massachusetts Amherst

Amherst, MA

B.B.A. Marketing, B.S. Hospitality and Tourism Management; Cum Laude

Sep. 2014 – Jun. 2018

<EXPERIENCE />

Sodexo

Boston, MA

Environmental Services Manager

Jun. 2018 – Jun. 2019

- Managed a team of 20-50 employees.
- Led training and conducted safety protocols.
- Interviewed potential hires, did payroll, scheduling, and inspections.
